Subject: Save the drip!!

Dear

My name is Olivia Slevin and I am 12 years old. I live in Gulgong and I believe The Drip should not be tampered with by a pollution making mine. Year 7 at my school (Gulgong High School) went on an excursion out to The Drip today to witness the wonderful views and beautiful flora and fauna that The Drip has to offer. If the drip is mistreated by the mine, then there is a possibility that public access will not be tolerated. This is an irresponsible thing for a mine to do and if the community is forced to go along with this, the mining industry will some day regret it.

Another reason I am feeling miserable with this declaration, is that the Goulburn River is very pretty asset to Australia and the mine is polluting it with its pollution. We must make them realise that the Goulburn River is not to be mucked around with. They must think that it is okay to make this gorgeous river into a dirty, smelly wasteland for the mine to dump its unwanted. That's all I have to say but I hope this makes a difference because The Drip is one of my favourite places to go as I love bushwalking and nature.

Yours Sincerely,

Olivia Slevin
