

## **Oxley Solar Farm Objection**

Name: [REDACTED]

Address; [REDACTED]

Dear Minister

SSD No - Oxley Solar Farm Armidale

I am writing to OBJECT against the proposed Oxley solar farm SSD 10346. I do not agree with proposal and I will address my issues.

My main concern is the danger towards the wildlife in the area and river system. I have been visiting the Blue Hole for the past 50 years and in that time, I have seen beautiful wildlife species, not just on the ground but in the river as well. In those 50 years I have seen wedge-tailed eagles, kookaburras, black swans, pelicans, platypi, kangaroos, koalas and many more species. How are you going to prevent these species from being harmed or killed? What if it brings endangered or threatened species to the brink of extinction?

My other concern is the bush fires. What plans are you going to put into place (if any) to stop the fires from raging through the farm? The last bush fires were 15km away and going through thick national park it would have taken about 10 minutes to reach the Blue Hole and keep going. This would have then torn through your farm releasing toxic fumes into the air that other people would then be breathing in, how is this healthy for the community? What can you do to prevent this?
