**Subject:** 65/530/47: Newcastle Coalfield - Public Exhibition - Environmental Impact Statement EIS for the Able Upgrade Modification Project Approval 05-0136 - MOD 3

---

Good afternoon Sophie,

ARTC have perused the Environmental Assessment (EA) as provided by the proponent Donaldson Coal for the abovementioned modification. Subsequently ARTC advises that the proponent will be required to undertake and submit modelling to ARTC to determine the impacts on the overall operations of the Hunter Valley rail network particularly resulting from the proposed increased capacity of the Abel Mine upgrade.

I trust I have provided you with an adequate response, however should you require further information or clarification please do not hesitate to contact me.

Kind regards,

*Teena*
