RE: Ardmore Park Quarry Bungonia

Dear Sir,

I too share the concerns of my family and friends as a member of the Bungonia community. It is sad that an organisation such as Multiquip Quarries has tried to dupe the local community in thinking it has best interests at heart, yet we now hear of a proposal for Multiquip to use the local roads prior to the completion of the relevant route upgrade we first heard about.

As a local I have heard nothing direct from Multiquip and have confirmed with other locals who also share the concern of not being consulted. As a resident of Jerrara Road, I am worried the use of the road as a transport route will have a negative effect on all of us. Travelling on Jerrara Road will be more dangerous and result in worse wear and tear of the road which is already unsuitable for heavy vehicle usage.

Like most residents, I enjoy living in Bungonia and whilst we have been worried for some time about Multiquip's intentions of increasing their quarry transportation, we have never been more worried than now to hear they are not following through on what is required of them to upgrade the transport route before proceeding any further.

As a concerned local, I am one of many voices. Please take the time to review the proposal and consider the risks it places on us, young children, and the local wildlife. These local roads are not fit for transportation of this type, nor do we want to be affected by the noise and pollution in our tranquil community. Please reject the proposal from Multiquip.

Thank you for listening.

Kind Regards

Panagiotis Kyriakopoulos
