RE: Ardmore Park Quarry Bungonia

Dear Sir,

As a member of the Bungonia community I am deeply concerned with the approach Multiquip Quarries has taken to deceive the locals and make use of local roads. Like many others I feel that Multiquip Quarries is blatantly disregarding and neglecting it's responsibility of upgrading the Project Transport Route previously mandated.

First and foremost, the community has not been consulted, and the risks associated with this move are forsaking the lives of people and wildlife, in aim of commercial gain. Where there have been opportunities for Multiquip Quarries to engage the local community and address their proposal, they have not stepped up.

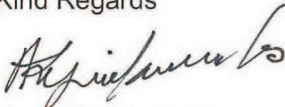

As a resident of Jerrara Road, I know too well the poor condition of the road and how unsuitable it is, yet Multiquip assume it is fit for local deliveries. All the measures required to upgrade the road which includes widening the road have been ignored and remain unactioned. Why is this allowed? Why is Multiquip Quarries allowed to utilise the local roads prior to completion of the necessary upgrade, without consequence?

Like most residents, I enjoy living in Bungonia for the escape it provides me from the bustling city. If our local roads become carriageways for Multiquip Quarries, it immediately raises noise pollution, air pollution and reduces our safety. Sadly, there have been incidents on Jerrara Road that have claimed the lives of people. Having quarry trucks speeding on a windy road that has numerous black spots, is careless and incomprehensible.

Please take the time to review the proposal carefully, as it has many hidden agendas, none more unsettling than the commercial urge to make local deliveries without the demand of the locals for such deliveries. What is Multiquip truly planning if it has not been transparent with the community? I urge you to reject the proposal from Multiquip.

Thank you for your time.

Kind Regards

Anna Kyriakopoulos
