November 5, 2013

I am writing to comment on the State Significant Infrastructure Application No. SSI 5982 for the Northern Beaches Hospital.

I have attempted to do an online submission but had difficulty and don't think it was successfully submitted.

The proposal mentions the probable widening of Frenchs Forest Road West, but includes no details about this. The widening of this road will have a huge effect on residents like us who live on or close to the road. Will the local community, and those of us immediately affected, be included in the decision making regarding this? We need to be informed about what is planned and be able to contribute our thoughts.
