Good Morning,

**TransGrid Reference Number: 2021-209**

### **Notice of Exhibition – Liddell Battery and Bayswater Ancillary Works (SSD-8889679)**

Please find TransGrid response to Notice of Exhibition – Liddell Battery and Bayswater Ancillary Works (SSD-8889679 below

#### **TransGrid request that the Proponent:**

I have reviewed the EIS and don't have any property issues to raise. The proponent has acknowledged TransGrid and ETMHC in respect of our Liddell Substation and the TL Outlet easements coming out of same.

The proponent has noted the need to arrange a connection into TransGrid Liddell Substation.

- a. Provide shapefiles of the project so we are able to confirm that TransGrid's easement is being avoided and appropriate setbacks and any Asset Protection Zones are in place;
  - b. Liaise with TransGrid when finalising the design of proposed connection to TransGrid's Liddell Substation;
  - c. Provide details of expected impacts to TransGrid's Liddell Substation and include all required approvals for proposed connection to TransGrid's Liddell Substation in the EIS;
  - d. Shapefiles of proposed connection between the transformer yard and TransGrid's Liddell Substation;
  - e. The proponent is to continue liaising with TransGrid to satisfy clause 5.3.4 of the National Electricity Rules.
  - f. This Project isn't a customer project as yet.
  - g. The customer will need to continue to engage with TransGrid, via executing a Connection Processes Agreement to finalise the connection to the TransGrid's network.
