Dear Sir,

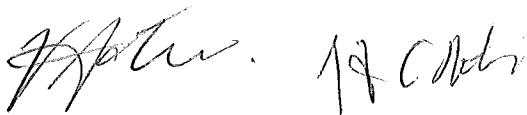

I am writing to strongly protest about a recent modification to the proposed redevelopment of the Fort Street Public School.

While, in general, I do support the redevelopment of the school I am strongly against the proposed increase in height. ie. - " the additional storey associated with lift, stairs and plant room."

I would fight to retain the overall character of the Rocks including building height, sight lines and silhouettes.

The understanding since this development was initially proposed was that the existing overall dimensions of the building would be retained. Such a creeping expansion should be strongly resisted.

Thank you for your consideration.
