Sydney NSW 2001

To whom it may concern,

Re: Support for the Maxwell Underground Coal Mine Project
Application Number: SSD-9526

This letter is to show my support for Malabar Coal's Maxwell Underground Coal Mine Project.

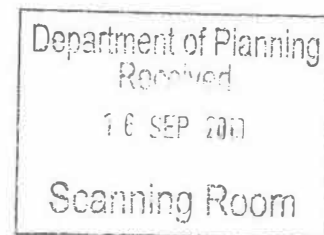

I am supportive of this application for numerous reasons:

- It's creating another 350 jobs for the local area
- Economic benefits to the local community, especially all the local shops and suppliers in the Muswellbrook area
- Further financial support to local community groups and charities

The Maxwell site, formally known as Drayton Mine has a very long and proud reputation in the local area. Many of my family and friends have been employed at this site when it was an open cut mine, it would be great to think future generations can be employed there as underground miners.

I support this application and hope the Department of Planning gives it approval to proceed.

regards,
Ken Mann
