To Whom It May Concern

**Re: Maxwell Underground Coal Mine Project. SSD-9526**

My name is Tony McFadden and I am CEO of Sada Services Pty Ltd.

I am writing to lodge my support for Malabar Coal's Maxwell Underground Project.

This is a sensible project that has been designed so our community can enjoy a much-needed economic boost without negatively impacting other local industries and land uses.

I support the project because it will deliver important benefits for the local community and NSW.

- **ECONOMIC BENEFITS:** The Maxwell Project will create 350 new jobs for the region. These new jobs and the wages that will flow from them, will deliver a much needed boost to the local economy. Further afield, the project will also generate \$1 billion to \$1.25 billion for the NSW State Government and local Councils. This money can be used to upgrade regional hospitals, schools or infrastructure. Projects like this help ensure our ongoing prosperity and can support the economy for years to come.
- **JOB CREATION:** The project will mean 350 more skilled jobs for the local community. These jobs will inject around \$55 million in wages into our community – benefiting many other businesses in the area. Malabar has also promised to provide training for local people so the skills to operate an underground mine can be developed within the local area. They have also said they want to prioritise hiring locals to ensure that the benefits of the project stay here in the community.
- **LOCAL ECONOMY:** The project will boost our local economy and help local business owners. It will support a wide range of local businesses throughout the construction phase and operation of the mine over 26 years. Long term projects, like this one, will mean local businesses can make more investments, grow their operations, hire more people and keep workers – especially young people – in the region.
- **COEXISTENCE:** The project is a common-sense “win-win” for our community. Previous open cuts proposals were contentious, but Malabar have heard us and developed a sensible project that means our community can benefit from the economic

boost a new mine will provide – while also allowing the horse studs and other land uses to continue their operations. I'm pleased that the EIS for the Maxwell Project shows that the underground mine can co-exist safely with other industries. Co-existence has always been an important part of our community. Having a number of strong industries has helped our community to flourish. This project means that can continue for years to come.

- **SOLAR PROJECT:** I appreciate that Malabar are also investing in a solar farm on their rehabilitated land. If approved, this could provide additional power directly to the grid, or help to power local businesses and homes. This shows the company is open to different ideas that can benefit our community.

These benefits will make a substantial long-term difference to the communities in the Upper Hunter and to NSW.

Our community needs a diverse economy and the Maxwell Underground Project can help make sure our economy prospers for decades to come.

Yours sincerley,
