Attention Jack Murphy

EAST GUYONG QUARRY-MOD 2[PA 06_1093 MOD 2]

Dear Sir

Further to our conversation recently I have further perused the application for the said modification.

I am the land holder of the property Patanga that wraps around the quarry site on the western side taking in 170 acres. This property has building permission from the Cabonne Council.

Reference is made for the three properties with houses but my property is not given consideration in any way.

As the extension will be a lot closer to much of my property it will be more affected by the noise from the excavator, blasting, truck movements and dust that billows from the site.

I object to the lowering of the bund by 16 to 20 metres, on the western side, as indicated in the modification. No one has been on my property to see the effect the present work site presents and what the lowering of the wall will expose with the extension of the quarry to the west.

As you are aware trees that will be planted on the proposed wall will take years to grow and give any screen.

Yours faithfully,

Christine Hindmarsh
