

Sutherland Hospital**Landscape Statement by the Consultant**

Project: Sutherland Hospital

Landscape Architects: Arcadia Landscape Architecture Pty Ltd

ABN: 83 148 994 870

To whom it may concern,

This Landscape Statement is given in relation to the Landscape Documentation carried out by Arcadia Landscape Architecture Pty Ltd. The intent of the Landscape Statement is to adequately provide reason and justification as to why the design of landscape is as provided.

Provided to Arcadia from the Sutherland Shire Council in the format of a written comment below:

“10 trees including Syzigium, Eucalyptus and Corymbia species are to be removed. Council's tree replacement ratio of 8:1 is recommended to form a condition of consent as recommended in the addendum to this letter. Further, proposed tree species require substitution to better reflect species that are endemic to the Sutherland Shire. This is also detailed within a recommended condition of consent.”

Arcadia Response:

With regards to the design, the trees selected are of the Sydney turpentine-ironbark forest, North Hinterland Wet Sclerophyll Forests and Coastal enriched sandstone dry forest which is found from Arcadia Background research. No professional ecological input has been provided.

We would be more than happy to change the planting species to better reflect the request from Sutherland Shire Council.

The physical landscape area provided after accommodating the existing car park and building footprint is limited. This limited physical scope only allows for a certain number of trees to be planted - 19 Trees. The landscape design looks to provide as many trees as possible.

Arcadia Landscape Architecture hereby states landscape design prepared including the Drawings listed below have been documented to our best knowledge in accordance with Health Infrastructure NSW.
