The Premier
Mr. Barry O'Farrell, MP
Level 40 Governor Macquarie Tower
1 Farrer Place
SYDNEY N.S.W. 2000

Dear Mr. O'Farrell,

Re- COBBORA COAL MINE

I object to this Mine, because:

1. The Government will lock taxpayers into funding a polluting coal mine that will cost billions \$ in subsidies.
2. It is bad for the environment - dirty coal + adding many million tonnes more of CO2 emissions and greenhouse gases.
3. Before the State Election, in 2011..Treasurer Mike Baird stated, " There are very significant risks and costs being imposed on the whole of N.S.W through the Cobbora development "

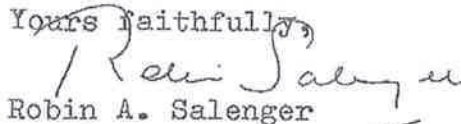

What has changed since Mike Baird made his comments sounding the alarm on this Cobbora project ?

4. This project is in direct conflict with State & Federal policy to reduce climate change impacts.
5. Destroys the environment and land of high conservation and agricultural value, including woodland habitat for many threatened & endangered species, aboriginal heritage sites and the impact on groundwater and surface water sources.
6. Towns and properties along the coal chain will be affected by additional noise, dust, air pollution from increased coal train movements.
7. It locks N.S.W into a heavily subsidised coal fired future, instead of renewable energy.

DEMOCRACY = By the people, for the people. Well, the people in the Central West say NO to this project.

I voted for the O'Farrell Government, believing it was Trustworthy and honest, and would listen to the people of N.S.W.

Yours faithfully,

Robin A. Salenger
