Submission by June Pye, Dalton

10/4/17

I write this submission opposing AGL's extension of time for commencement of the proposed Dalton gas power plant. I am a 73 year old lady that has lived in Dalton all my life. I have raised my 4 children here with my husband and the kids had a great community to grow up in. My husband has now passed away and my children have moved away however one of my daughter's lives in Dalton with her husband and 4 children and they are enjoying their lifestyle as my daughter did in her childhood years. About 18 months ago my 94 year old mother and my 83 year old step father house burnt down it is at Springwood Dalton one of the closest houses to the proposed power plant. They are now living with me in my home in Dalton. If we were forced to move from our community because of the noise and the emissions where would we go? I have the support from our community nurses which come out and help me with my step father as he is very sick. My mother and step father hope to rebuild and be able to go back to a new home at their property to enjoy the rest of their life in peace. I don't think this will happen if AGL build the proposed power station. As five years ago they approached my mother and step farther and said that they would double glaze there widows because of the noise. I remember when I was living at Springwood Dalton there was earth tremor that cracked walls and nocked bricks of the chimney. So it's only a matter of time that there will be a big one and you're going to build a gas plant in an Earth Quake zone? I would like AGL to think about our lives and in the way we live in our community as we all support each other and we will all stand together and fight against this proposed power plant project.
