Our ref: MP 09 0186 MOD 1

Dear Mandana,

**Mount Piper Power Station Ash Placement Project  
Proposed Modification (MP09\_0186) MOD 1**

Dams Safety NSW appreciates the opportunity to comment on the modification application for Mount Piper Power Station Ash Placement Project MOD 1. DSNSW has reviewed the document and the proposed emplacement structure is an old mining void with no proposed manmade embankments. The emplacement structure is therefore not a 'dam'. Consequently Dams Safety NSW has no comments on the proposed project and no recommendations at this stage.

In the event that a future modification to the project proposes the construction of embankments DSNSW would appreciate the opportunity to assess the modification.

If you have any queries in this regard, please contact Heather Middleton on 0428288391 or [heather.middleton@damsafety.nsw.gov.au](mailto:heather.middleton@damsafety.nsw.gov.au).

Yours faithfully,

Heather Middleton  
Manager Mining Impacts – Dams Safety NSW
