Subject: Graythwaite Concept Plan

Re: MP 10_0150 & MP 10_0149 – Graythwaite Concept Plan

These plans are a gross over-development of the site!
And, contrary to many statements from the school, will
result in an significant increase of pupils.

In regard to any application, the Department of Planning must look at the actual
impacts that will result .

These traffic impacts have not been assessed or analysed and no workable solutions
have been presented.

I am utterly amazed about any plan to have cars exiting onto
Union Street.

It is a very busy road, on a bus route, and the left turn into Blues
Point road allows only three cars to turn at the traffic light,
resulting in very heavy congestion.

The cars will exit on top of the hill, with very limited view of traffic
coming and going.

**This is exactly the most dangerous part of Union Street,
and it will be an accident in waiting.**

These plans are amateurish and dangerous.

The Proponent cannot simply leave the analysis of traffic impacts to some future time.

I OBJECT TO THIS APPLICATION.
