Dear Sir/Madam

Coalpac Proposal

I refer to the new Cullen Valley and new Invincible proposals for the development of area coal mines, and object to the proposed modifications on the following grounds -

1. the mining will destroy unique biodiversity, including a Grassy Box Woodland and nationally endangered plants such as Clandulla geebung shrubs and 2,300 threatened Capertee Stringybark trees
2. the mining will threaten internationally recognised rock pagodas by ignoring the 300 metre minimum buffer recommended by the Planning Assessment Commission
3. the mining will provide poor quality coal at a massive impact, when other sources are already available
4. the mining will increase morbidity and mortality in Cullen Bullen from respiratory and cardiovascular disease linked to dust emissions

Yours faithfully

L Colvin
