Dear Sir,

I have lived in Cullen Bullen for 34 years, my late husband worked at Invincible Colliery for over 40 years; I am fully in agreement with the Invincible Colliery and Cullen Valley Mine's proposal to go ahead.

We need these mines to go ahead so our village can survive.

Cullen Bullen has always been a mining town and how people from the Blue Mountains can come to our Village and protest against the mine when they don't even live here is wrong.

Cullen Bullen has a population of approximately 198 residents; there is only a very small majority of this population who are against the proposal.

We need the employment; and the businesses in surrounding towns are also doing it hard.

Invincible Colliery and Cullen Bullen Valley Mine have always supported our village and surrounding towns with donations and in-kind work,

In my opinion the concerns that have been made about the (dust) from mining is going to affect our health "what a load of rubbish" I have more dust from the cars driving down my street each day than what I have had in the past 34 years I have lived in this Village.

I am asking you to please consider the points I have made and the opinions of the residents that live in the Village and not the comments and remarks from those who do not even live here when making your decision

Yours Faithfully

Barbara Milne
