This is a submission objecting to the proposed Port waratah coal services Terminal 4 development in Newcastle (10_0215). **The T4 proposal must not be approved** due to the significant and unacceptable impacts as detailed below.

Impacts on habitat, endangered and threatened species, and migratory birds

Areas of Kooragang, also surrounds significant in terms of habitat and migration - the existing impacts of industry require serious mitigation and therefore additional polluting industries are not appropriate.

Impacts on air quality

As a family living in the area, we are impacted by dust and continual respiratory infection. This is an inappropriate land use particularly given the alternatives available (i.e. ~~less poll~~ low/no pollution)

Water pollution and dredging impacts

Social and economic impacts in Newcastle and Lower Hunter

We need to look at alternatives and fast.
This is a development that threatens
our ability to plan for alternatives. This type of
industry does not create longer-term employment
or build a skill base that supports a smart and
sustainable region.

Impacts due to increased coal mining in NSW

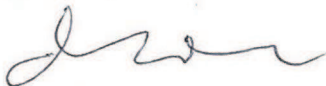

See above - coal mining is the biggest
contributor to catastrophic climate change.
Communities in the Hunter are bearing the
brunt of impacts on health, amenity and
socio-economic impacts. ~~A~~ Relatively few
families benefit, and where they do the trade-off
are the impacts of harsh working conditions and
health impacts.

As submission makers are required to disclose political donations totalling \$1000 or more in the past 2 years, I can state that **I have not made a disclosable donation.**

Your Sincerely,

Alison Harwood
