This is a submission objecting to the proposed Port waratah coal services Terminal 4 development in Newcastle (10_0215). **The T4 proposal must not be approved** due to the significant and unacceptable impacts as detailed below.

We live within 100m of a rail line that is used constantly for transporting coal. The approval of another terminal will increase the number of trains going past our house, which already adversely affects us through excess noise & pollution.

Additionally it is time that Australia developed a long term sensible policy on fossil fuel usage. Coal is a finite resource that will run out & so should not be mined & mined until that happens. Let's change our focus from coal to other more sustainable energy sources

As submission makers are required to disclose political donations totalling \$1000 or more in the past 2 years, I can state that **I have not made a disclosable donation.**

Your Sincerely,

(Signature)
