CURRINGTON 2298.

This is a submission objecting to the proposed Port waratah coal services Terminal 4 development in Newcastle (10_0215). **The T4 proposal must not be approved** due to the significant and unacceptable impacts as detailed below.

Impacts on habitat, endangered and threatened species, and migratory birds

Mining has the ability to encroach on habitat of species existing only just slightly on slender corridors of wetlands and supporting ecological communities. Wiping their tenuous grip on the land they live on. These species, won't come back. Ever. It's not like moving out so the painters can move in, the moving back when ~~they~~ the coats are dry.

Impacts on air quality

Stinks. Always. Smelling at night. Depressing pong. Stops me from getting a good night's sleep. Makes me grumpy the next day. Dirt in the air stays in lungs for a very long time. Rough.

Water pollution and dredging impacts

Pollution happens out of sight. Under ground water supplies. Salty. Brown water. Upsetting. Dredging silt created by diverted creeks and water flows disturbs all sorts of tiny life forms. At least the moths will be happy when we leave the front light on all night cause we're scared of drugzom.

Social and economic impacts in Newcastle and Lower Hunter

Impacts due to increased coal mining in NSW

As submission makers are required to disclose political donations totalling \$1000 or more in the past 2 years, I can state that **I have not made a disclosable donation.**

Your Sincerely,

(Signature)

(Normally submissions are made public. If this is an issue for you please indicate below)
