This is a submission objecting to the proposed Port waratah coal services Terminal 4 development in Newcastle (10_0215). **The T4 proposal must not be approved** due to the significant and unacceptable impacts as detailed below.

Impacts on habitat, endangered and threatened species, and migratory birds

~~Impacts~~
Natural law reveals interdependency,
interconnectivity, and mutual service
which informs respect for a DUTY OF
CARE - by intelligent Human Species.
Negligence and the presumption of Ignorance
is not a just reason for Stupidity.

Impacts on air quality

Pollution from coal dust increases the
ill health of an already ill society

Water pollution and dredging impacts

disturbing the integrity of the harbour,
destroying the fragile ecology of the
mangroves, and polluting waterways is
anathema to spirit of service as revealing
natural laws and constants.

Social and economic impacts in Newcastle and Lower Hunter

The profound influence of corporate interests on educational dictates has already effected communities close to mining regions. The impact of mining on food ^{production} tourism, the production of cottage industries which rely a quality produce is threatened.

Impacts due to increased coal mining in NSW

Coal is the most polluting resource on this planet. Any Colony which supports ~~the~~ increased mining, is a colony subject to the tyranny of ignorance cultivated by corporate industries ~~not~~ through condoning sex stocks of suicide in a manner that serves industry alone - the impact of coal mining ~~is~~ ^{its}

As submission makers are required to disclose political donations totalling \$1000 or more in the past 2 years, I can state that **I have not made a disclosable donation.**

Your Sincerely,

(Normally submissions are made public. If this is an issue for you please indicate below)

(Not public)

disruption activities of the colonisation of human mind.
