Re: Development Application: MP 11\_0042  
Hurstville Private Hospital Pty. Ltd  
HURSTVILLE

Dear Ms Owen,

I have inspected the above mentioned application and its supporting documents and wish to vigorously oppose the scale of development which is proposed.

At no stage has any consideration been afforded the residents of Millett Street Hurstville. I, and many other senior residents in the vicinity, will be negatively affected.

I have resided in this quiet area for over 20 years. At this time of my life, my greatest satisfaction is tending my well established small garden. With the height of this planned development, the sunshine which I now enjoy, will be obliterated. Traffic too will cause major problems in our street.

I have included some pictures (1-3) to demonstrate the impact to the sunlight. The pictures are taken from my backyard and demonstrates the sunlight I get from approx 7:30a which lasts until noon. This will be impacted greatly should the development continue.

I am not in a strong financial position so selling my modest home to relocate would not be an option.

The tranquillity and sunlight which we now enjoy will be greatly compromised by this development and I therefore implore you to consider the untenable situation in which the residents of Millett Street Hurstville have been unfortunately placed.

I understand that there has been an Environment Assessment report developed by the Hospital, however can I remind that those that develop these reports do not live there.

Regards,

Milka Trajkovic
