Dear Mark,

As a resident of Dick St in Chippendale, I would like to object to the mass of the new building on Block 8, as having recently seen building works start and realised the enormity and scale of the building and how will it adversely effect our quality of living.

I don't think the planners have taken into consideration the impact of such a size of building on local residents, as I can now see from the location and size of the crane on the site how the building is basically going to block out a huge chunk of sky and light from my home, diminishing my quality of living.

This reduction in light will obviously completely change the aspect of my home and my outlook , and potentially devalue it.

I feel the size and mass of this building in particular has not been given due consideration to it's surroundings and residents, and it has not been fairly scaled down towards the O'Connor St side, it will truly be enormous and out of scale with the existing streetscape, so I formerly object.
