

[REDACTED]

12 October 2012,

To whom it may concern,

Re: Orange to Macquarie Pipeline – Environmental Assessment.

[REDACTED], I object to this report and to the project on the grounds our representatives were not involved in the survey work and therefore did not speak for our country, artefacts or sites. Those organizations involved in the survey work do not speak for us and they are not recognised as traditional and have no right to speak for our heritage, artefacts, sites or lands. I further object due to the negative environmental effects that this project will have on threatened species of flora and fauna and to the proposed removal of 19.5 hectares of vegetation including habitat that is sensitive.

Yours faithfully,

[REDACTED]
