Re: Martins Creek Quarry (Application SSD 6612)

I **object** to the proposal for the below reasons.

I have lived in Paterson since 1975(47 years) on a small farm of 40acres.

I have lived the experiences of the trucks through Paterson. The road is far too narrow with cars parked both sides of the road. With semi-trailers passing each other I'm scared to stand on the footpath and the Post Office corner.

The pollution and diesel fumes and noise from the trucks is unacceptable.

It is very dangerous to cross the road.

For safety reasons I would prefer all gravel to be transported by rail and covered to stop the dust that already comes from the trains.

I feel that the loading of railway wagons of a night is unacceptable. This will affect people's sleep and mental health. This facility is not in an industrial area.

I am also very concerned about the destruction and lose of native habitat for the koalas and eastern quoll and other native animals and birdlife that currently live in the quarry area.
