**Re: Submission to NSW Department of Planning and Environment  
Jupiter Wind Farm (Tarago, NSW)**

Dear Sir / Madam,

My partner and I strongly oppose the development of the Jupiter Wind Farm development as proposed by EPYC. We have lived in this area for almost ten years (see J234A and J234B of the EIS) and we have attempted on multiple occasions to engage EPYC in a positive manner. We have had little success. Their engagement of the local community is poor at best...

Please find attached my submission in relation to this proposal. Each section of my submission has been aligned with EPYC's EIS. Where possible I have used the headings from the EIS so as to more easily identify the section being referred to. I hope this assists the Department in reviewing my submission.

Appendix A: Recommendations contains recommendations in the event the Jupiter Wind Farm is approved, or other areas where the EIS can be improved. I have also provided a summary the reasons the Jupiter Wind Farm should be rejected in Appendix B: Basis For Rejection.

I apologise for the length of this submission. However given the number of defects and omissions contained in the EIS, a holistic approach was require to draw out the underlying issues in EPYC's submission.

Please do not hesitate to email me if you have any further questions.
