Re Jupiter Wind Farm Proposal

SSD 13\_6277

I object to the proposed Jupiter wind farm.

I object until such time as your department has provided evidence, which will stand up in court, that the wind farm will not blight the <sup>1.</sup>view from my particular property or surrounding areas and will not in any way, such as <sup>2.</sup>noise, harm our sleep or health or harm our amenity on this property or in other ways harm our lifestyle, including reception for TV, radio, <sup>3.</sup>mobile phone and internet, and that it will not increase the <sup>4.</sup>bushfire threat to my property or increase the difficulty of protecting my property from bushfires or devalue my property.

I look forward to the provision by you of fully researched analysis independent of the developer, in relation to this particular property, to establish there will be no harm and, in the absence of such evidence, register my objection.

I have no reportable political donations in the previous two years.

1. & 2. The wind towers will be on the grassland to my north at an elevation of 700 metres. My house is at an elevation of 760 m in bushland. Most trees have a height of about 10 m. with towers at a height of 143 m. I expect I will see and hear the blades clearly on low wind days which is the only time I see them moving at Capital Wind Farm.

3. Mobile phone signal is ~~not~~ notoriously poor and patchy here.

4. On 12/12/16 I watched a fixed wing fire fighting water bomber below me.
