Dear Sir,

**Proposed Blayney Abattoir - SSD 6594**

It has been brought to my attention that a new abattoir is being considered for construction in the Blayney area and I wish to protest most strongly at the planned proposal. I am a retired general medical practitioner and after 40 years practice in town have retired on the town's outskirts. When I first came to the area there was an abattoir for cattle and sheep, originally on the outskirts but the town expanded to be adjacent to it. It has been closed down for many years and the town has benefited enormously from the resultant loss of stench and heavy traffic, its departure has encouraged several new industries to come to town and develop. Consequently there has been no loss of employment opportunities and only improvement in the town atmosphere.

I am not opposed to a new abattoir being in the district but the site for this one is wrong for this town. The only approach to the site is down the main street of Blayney, the health hazards and traffic density created is not acceptable to any of us, from school children to retirement village patrons. The proposed building will be directly opposite 'Athol' homestead, a popular reception business conducted there which certainly will not benefit from the noise and smell whatever the reassurances of the abattoir management.

To allow this to proceed at the suggested site will be a very unpopular, potentially dangerous and damaging decision and interfere with the development of this attractive and delightful town.

Yours most sincerely,

*Harris I Redhead - MB BS.*
