GPO Box 39
SYDNEY NSW 2001

Attention Director,

Ref: Objection Application Number SSI 7485

We would like to lodge an objection regarding the above. As we understand, changes have been made to the original concept design. I believe the latest modification removes many of the favourable urban design features contained in that of the original concept especially with the massive overpass instead of an underground tunnel. This modification completely ignores the conditions of consent given for this project and therefore is totally unacceptable.

The proposed overpass is out of step with local Development in Annandale and will obstruct a local heritage mural on the Crescent and destroy Buruwan Park. An underground tunnel running under Whites Creek would make much more sense especially minimizing pollution.

Being of senior years this will directly impact us and many of our neighbours with no direct pedestrian route between Annandale and the Glebe foreshore without negotiating a steep incline and set of steep and unsafe stone stairs leading from Bayview Crescent to Johnston Street. At present we have a flat even walk between our home and the foreshore which we are anxious about losing. As longstanding residents of Railway Parade (more than 38 years) we are concerned that we have already seen one family sell up and leave our street due the proposed development with talk of more to follow.

For these reasons we would urge you to re-consider the plans to that of your original concept design.

Kind regards,

Arch & Sandra Price
