**Application: SSI 7485**

Dear Director Transport Assessments Planning Services,

I write regarding the proposed modification to M4-M5 Link, Mod 2 The Crescent overpass and changes to pedestrian infrastructure in North Annandale, Rozelle and Rozelle Bay Foreshore area.

I request RMS work with the community to explore alternate design options to the proposed new car overpass design and the changed pedestrian and cyclist links. I am seeking the reinstatement of the safe, direct access from the approved EIS GreenLink to create a continuous green open space connection from the Rozelle Rail yards and Annandale to the foreshore. The GreenLink was more than just a walk way - it put people central to the design, maximising safety, and providing much needed accessible open space for the community now and into the future Bays Precinct design.

I am requesting RMS put people back into the plan - we want you to reinstate your own vision as laid out in Transport for NSW Future Strategy 2056. Work with us to design a feasible option that brings the best elements from the approved EIS design into the modification.

My key concerns with the M4-M5 Modification are:

- The significantly reduced safety and increased risk for pedestrians and cyclists with removed access over The Crescent to Bicentennial Park and the increased traffic along Johnson Street.
- Being required to cross five sets of pedestrian lights at The Crescent as my option to reach the foreshore from Annandale or from Rozelle Bay light rail stop.
- Removal of direct active links to the foreshore, cutting the community off from the area and the proposed revitalisation of the entire Bays Precinct, including linking the Light Rail and Bus stops to a Ferry wharf and Metro station.
- Urban and landscape design that is being built before a finalised Masterplan for the area.
- Traffic changes that limit movements around the suburb and create further congestion in the local streets of Annandale, Forest Lodge, Glebe, Lilyfield and Rozelle with no planning to deal with these.

Alongside these issues my other concerns include:

*My family and I visit The Foreshore Park 1 to 2 times a day. We live on the North side of Annandale + cross at the lights at The Crescent + Johnston. The changes to this area would make it unsafe + too difficult for us to continue to do so. We have a toddler and a dog and so navigating five sets of lights + busy roads, with groceries usually bought at The Tramsheds would just not be feasible. Please consider the impact to the local way of life, our environment + local businesses.*

My submission is asking RMS and the Project Team to:

- Reinstate the GreenLink connecting communities and green open space from Rozelle to Bicentennial Park
- Relocate and design pedestrian and cyclist connections that are continuous, safe and direct.
- Design the modification infrastructure and active links in response to the character of the suburbs, the location of the foreshore and it's potential future development.
- Provide pedestrian and cyclist paths that maximise people safety and do not force them onto busier streets, unsafe concrete plazas and caged walkways.
- Integrate active and direct connections to all active transport – including the future Metro West and Foreshore Ferry Wharf

Furthermore I suggest:

'Greening' any plans you have to maintain the environmental aesthetic + integrity of the area. And considering the real-life impact to families + local residents who use the area daily.

Keeping the park + the Tramsheds as accessible as possible for those of us who's way of life will be greatly impacted, as to not also

Yours Sincerely,
