Dear Director Transport Assessments Planning Services

**Application SS1 7485**

I write regarding the proposed amendment to the 'M4-M5 link, Mod 2'. This departure from the original approved proposal is to the detriment of people accessing green open space on foot, by bicycle and access to public transport options. Safe and easily accessible public transport is key to a modern Australian city like Sydney.

Please consider alternative designs for this project that put people back into the plan and create usable and accessible spaces for communities to live and work. Specifically I request that the GreenLink is reinstated and that pedestrian and cyclist connections are designed to be continuous, safe and direct.

Please work with the community to design the infrastructure and transport links that reflect the character and wishes of the local community.

Yours sincerely

[REDACTED]  
Ruth McCarthy
