Director, Transport Assessments Planning Services
Department of Planning, Industry and Environment
GPO BOX 39
Sydney , NSW 2001

Application:SS! 7485

Dear Director transport Assessments Planning Services,

I wish to lodge an objection to the proposed modifications.

The designing of new infrastructure is the time to get things right, pedestrian links and connectivity are just as important as roads.

I request RMS put people back in the plan - I want you to reinstate your original design which provided a Greenlink walkway that put people central to the design, maximising safety and providing much needed accessible open space for the community and into the future Bays Precinct Design.

As public transport links improve, there needs to be much thought in how pedestrians will move between modes especially if we obtain new ferry routes.

Please don't let own suburbs be designed by traffic engineers. Please use create forward thinking designers.

Your sincerely

Gulliver HULL
