Berry NSW

Dear Director,
Having had an appointment with your Berry office and Roy and the team, well done on this due diligence, of offering this service to all concerned, and I had over an hour with them, being shown the 3D Interactive route, including the Bypass north of Berry, close to Mananga Homestead, and also the feeder road which will service 6 other farms onto the road that leads now to mine and the old Young place, which you have bought, see image below

Looking at the plans for the feeder road, am able to understand why it has to come past Mananga Homestead circa 1894 and started 1861, using the existing road and SAVING ALL THE TREES THERE, and also not disturbing the historical site near the trees also, as Aboriginal

Culture and history and non Aboriginal (historic heritage) must be preserved there.

I was reassured that the 5 Beautiful Liquid Amber trees and historic site will be preserved and I thank you for this.

The noise of the Bypass coming into Berry will be acceptable to Mananga Homestead and the feeder road also, with minimum disruption to getting to my property, and making a safe cut through the 2 last trees as the exit point onto the road to Berry and back to the Bypass

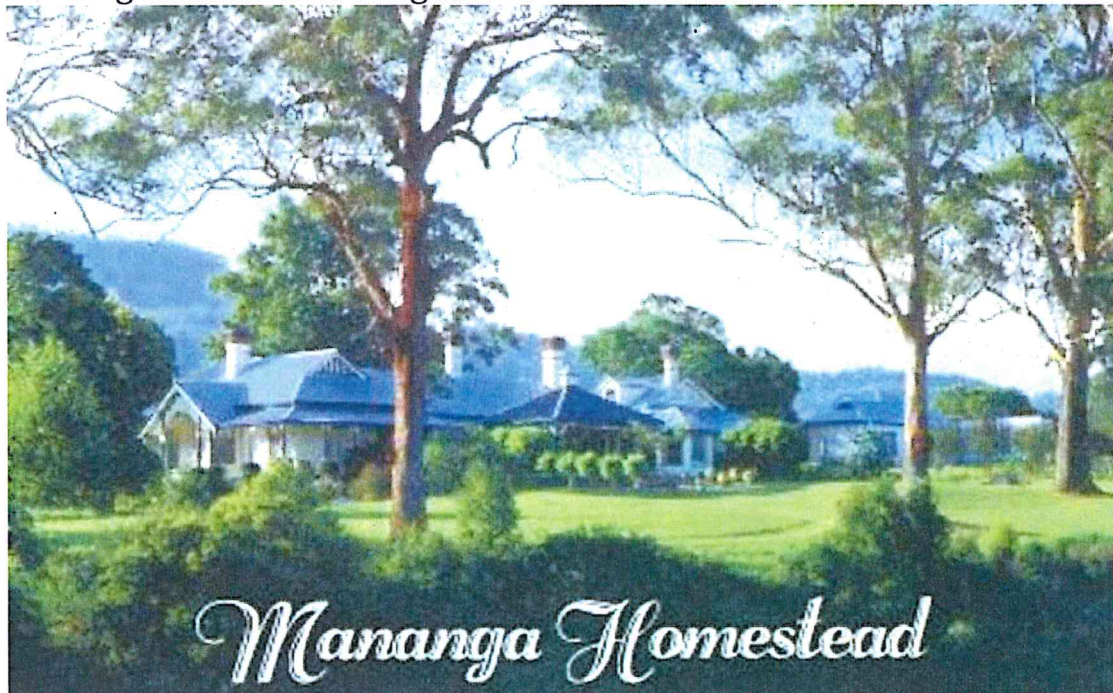

I appreciate the work involved and would like to congratulate you and your team, and I was informed that this feeder road will not be much wider than it is now, and just the entry and exit points from this feeder road will change as cattle trucks and farm machinery will use this also, and will need a better turning point to enter and exit.

As long as the trees stay and the historic site remains, I am okay with the concept that you are developing within the Berry community.

But on condition that these old Trees stay as does the historic site under the trees

Mananga Homestead image below

I thank you for your transparency and due diligence with the Berry Community and if all goes as it has been told to me, I can live with this

Much thanks

Hania
