Dear Director,

Re Proposed Foxground and Berry bypass
Victoria Street Design Options, November 2012

I support and request you, the Director of Infrastructure Projects, to instruct the RMS to implement **Option 3** for Victoria Street, Berry.

Option 3, by keeping Victoria Street open and maintaining two way travel between Queen Street and Victoria Street, with the southbound ramp off Victoria St, will provide the greatest benefit to the people of Berry.

It is the option which maintains most closely the present traffic patterns for residents and for the many travellers who use Mark Radium Park, a favourite 'Rest and Revive' spot.

To have Victoria Street open is a much better option than the unnecessary forcing of traffic on to George and Edward Streets, which would occur if Options 1 and 2 were employed.

Yours truly,

Mary Collins
