

Dear proponent of Cabramatta Freight Rail Loop

Thanks for allowing me as a visually impaired person to make comment.

Will there be further opportunities for public exhibition/consultation after insertion of missing finalised information?

In widening the rail corridor, whose responsibility is it to extend the pedestrian over bridge and relocating ramps and elevators? Will the project and such relocation of ramps/elevators, maintains access to pedestrian, cycle and persons with disabilities?

It is concerning that the normal procedures for protecting heritage do not apply to site. What mechanisms will be provided to prevent damage to heritage adjacent to site? What mechanisms will be provided in the event of damage to heritage adjacent to site?

Again, thanks for allowing me to make comment.
