

I have made no political donations and I strongly object to the Cabramatta Loop project which will facilitate enormous diesel emissions for Freight Trains over a big part of Sydney hich our governments show little interest in as they mostly do not live in the area. Diesel pollution always seem to overlooked and it poses a massive pollution risk over a big population of Sydney the distance of the freight Line and it must interfere with Public Transport passenger lines for a ever increasing population in the Sydney Basin which is a area of great population increase over future years. It is extremely bad planning especially considered only a very small portion of cargo will be used in the Moorebank Area which will be greatly impacted by traffic congestion and has experienced traffic gridlock over a number of years
