Dear Michelle

**Re: Regional Shooting Complex at Hill Top**

We are writing to voice our concerns regarding the removal of restriction on gun noise at the above complex.

We moved to Hill Top in 2010 and were aware of the Shooting complex and unaware of the application to increase activities. Our concerns are that the increased noise will not only impact on the residents, particularly those residing in the Northern area of the village, but also the precious wildlife in the State Forest adjoining the area. School children will also be affected with the local public school nearby, particularly if and when activity increases as reported, during the week.

As well as the above concerns, we feel that approval for increase at the complex will invite absolute disaster on local roads with increased traffic. The limited access now to Hill Top struggles at times to cope with local and through traffic on Wilson Drive, particularly in the area known locally as "the cutting" and then negotiating crossing the narrow access over the "Loop Line" rail bridge

The urgency for re-consideration of this increased development must be addressed by Government planners and we ask that you include our opposition with other local resident's concerned with this matter.

We have also advised our local State MP Pru Goward of our concerns.

Yours faithfully,

MJ & HE Dunlop
