Michelle Llanos
Dept of Planning
23 Bridge St.
Aylmer Que.

Dear Michelle : all others involved,
re the shooting range at Hill Top.

I really am concerned at the level of shooting of
departments and as Dept of Planning : all others re
regards the shooting range at Hill Top.

This 'issue' has been going on for many years now, I
am aware of our local council being against the enlargement
of the rifle range here.

Majority of people have chosen to live here in Hill Top.
as the quietness, rural & wildlife - birds, is the lifestyle
we have chosen to live - we have put our money
into our land & house & as we come here for health
reasons - id desperately concerns us, that groups can
overpower our council, knowing, right from the start
how much against this range going ahead, involving us
its own rules & regulations as it goes, so close to our
great school & wildlife & having the knowledge that
roads in & out of Hill Top are most dangerous for unmeas-
ured traffic.

My husband has been in local buses five times
for 21 years & has been out in that area where the rang-
e is that area was of big concern.

We are not against people wanting a shooting range,
BUT NOT ON OUR DOORSTEP where we have been
paid for, to live, & living up families,
just what right - has ANYONE / GROUP to be so

harassing to people in our area - harassing is a changeable offense in everyday terms - & surely, we here at Hill Top have the right to look into your continual harassment, when you are very aware of the impact your persistence, & the abuser range, is having on so many people.

As for the noise level, now adjusting to "how you group wants it" is very selfish & unacceptable, and you can be aware - is if you want to!!! And also one quite a few other areas you could make your abuser range, that would be more acceptable.

A highlight of this area, the bird life, will include a double the lowered, by the noise created & local people will undoubtedly have sleep patterns infringed on - is high through from babies, elderly, shift workers & general workers. Your group & any other you are associated with, in this matter of abuser range at Hill Top are extremely selfish - harassing so many factors & still harassing Hill Top people.

Another position of the noise factor this has caused is quite a few people of Hill Top are ex. servicemen & the sound of guns are very disturbing to them, after personal emotional suffering from being in that zone.

I therefore plead with your group & others you are working with on this matter, to at least, have some human understanding of the harassment that is happening to people here at Hill Top

Yours sincerely
Henry Wolfe JP.
