Hon Anthony Roberts

Minister for Planning

NSW Government

Dear Minister

New Asbestos

Regarding the proposed developments located on Gindurra Road at Somersby, I must inquire:

Is it honestly expected that residents are to welcome the 'new asbestos' to the Central Coast?

These waste products will be delivered in vast quantities by an endless stream of big, noisy trucks. How can this represent a positive change for residents?

700,000 tonnes of waste materials delivered every year in direct proximity to quiet, relaxed rural residential dwelling areas.

The clouds of silica dust dispersed amongst the neighbourhood will measure in tonnes as a direct result of these developments. Exposure to this dust is inimical to human biology and will result in nearby residents contracting silicosis. Silicosis is a terrible, painful, inhumane affliction that has horrifying symptoms and can result in death.

We are supposed to accept that all these negative impacts are to be endured for the sake of a few lousy jobs? Really?

We implore you, in the name of good reason and sense, please relocate this ill thought out proposal to an area more appropriate for the activities and less dangerous to surrounding residences.

With our utmost support and respect.
