I am strongly opposed to this "State Significant Development Application Kariong Sand & Soil Supplies Facility" on the following grounds:-

1. The very close proximity to houses (with young children) plus productive farm land which will be ruined, schools Kariong High School, Kariong Public School before & after day care facilities. Also Baxter Juvenile Justice Centre as well as Riding For the Disabled.
2. This area is a clean industrial area NOT a dumping pit.
3. 200,000 tonnes of waste where is it going? Pile Creek is not far away & will be impacted as will the rest of the Central Coast's drinking water. Exactly the same problem as Mangrove Mountain.
4. It is supposed to be "non-putrescible" but who is going to check the estimated 200 odd trucks dumping all sorts of matter no doubt asbestos & other undesirable matter.
5. The local road network will not sustain constant heavy traffic plus it will also impact on the M1 Freeway which is already plagued by heavy trucks which constantly break down once they have crossed the Hawkesbury River Bridge heading south up hill. Not to mention the noise which ensues.
6. Airborne contaminants such as asbestos silica dust and no doubt other nasty contaminates. Many residents already have respiratory problems and in at least one case full lung transplant asthma is another serious problem.
7. Where is all this "waste recycling" going to go? Are we going to see mountains of potential dumping? This is the gateway to the Central Coast where tourism is a very important industry & a valuable money earner why risk losing this.
8. I believe that not only number 90 Gindurra Rd is to be a dump but also 83 which is pristine bushland.
9. Land values will plummet "who wants to live near a dump" residents will be unable to sell not only houses but also farms, businesses & charities.
10. The health of all workers at Somersby will be put at risk as will Kariong & surrounding areas residents.
11. Farms which produce organic food will lose their livelihoods.
12. Why should the Central Coast be the dumping ground for Sydney's "waste recycling" plus there are mines which need to be rehabilitated & this may be a solution again the waste matter needs to be needs to be scrutinised first but how? is the important question.
13. Also I believe that there are Aboriginal artefacts in the area
14. The dump will be both an eyesore & odorous.
15. Tourism will also be badly affected especially the Reptile Park & it's animals will also suffer as will the animals from Riding for the Disabled which is very close to this possible "waste recycling" site.
16. I have not made a reportable donation to any political party as I don't have the money to.

Yours respectfully
