

Ulan Coal Mod 4

## **OBJECTION TO ULAN COAL EXPANSION PROPOSAL**

As a resident of the region, I strongly object to further expansion to the Ulan Coal operations.

The flora and fauna habitat in the region relies on the availability of water resources, both above and underground. The risks and impacts to good water flow to the Goulburn River and associated areas have not been adequately investigated.

Areas such as The Drip have special historical, social and Indigenous significance to residents and will be placed in significant risk through expanded mining.

I request that an independent assessment of these impacts be undertaken and no further mining expansion be granted.
