I would like to make a submission OPPOSING the Bango Wind Farm (SSD 6686) Response to submissions.

I have grown up in the peace and tranquillity of Rye Park. A place where I call home.

I am concerned how this proposal will impact my family and the future for my parents. They have worked hard to renovate and make our house a home. I am concerned that if my parents need to move due to the effects of the Rye Park wind farm that they will not generate enough from the sale of their home to be able to move, if they can sell at all. I would love to see them move forward in years to come to retire, it would be impossible for them to do so if they cannot sell their home and if they do for a significant lower amount than its value and the money that they have put into it.

How this proposal will impact on our extended family and friends. You can already see within the community the wedge that the Wind Farm is causing. The tension within the community can be cut with a knife.

I feel the density of wind turbines within the Rye Park area is extreme. With previously proposed Rye Park wind farm and then this proposed Bango wind farm. Rye Park will be surrounded and this will have a major impact on the health and wellbeing of Rye Park and the people that live there.

This development will also destroy the beautiful environment that exists in this area.

Yours sincerely,

Brooke Veness
