I would like to make a submission OPPOSING the Bango Wind Farm (SSD 6686) Response to submissions.

I am a member of the Rye Park Rural Fire Brigade and I am concerned how water bombing aircraft will not be able to access and assist in controlling fires in the region if required.

I am also concerned how the wind farm will impact our way of life and the environment we live in. Erosion and the resulting effect that run off will have on our pristine waterways in our location will have a major impact.

The effect the Bango Wind Farm will have on the value of our family home. The ability to sell the property for its true value if capital is required to relocate due to possible health or other such reasons.

The saturation of so many wind farms within such a small area. If this proposed Bango wind farm proceeds, Rye Park will could be enclosed by wind farms with no relief from any side. This cannot be good for our family, the Community or the environment. Wind farms should be located in remote areas and not areas where communities exist.

Yours sincerely,

Mark Veness.
