Subject: Application MP 09_0153 - submission comment

Hello

I reject this application for the following reasons.

University has enough sites to cater for education.
They have rooms or areas that are not being used or have been
handled negligently.

If they wish to educate in this segment of business then they should
consider using their unused spaces.

The site of the university is already overbuilt and needs to adapt to
the current and emerging controls or plans that have and/or are being
developed to keep up with sustainable living in an educational facility
or environment.
