Dear Hon. Ms Goward,

I am writing to you today to implore you as planning minister to stop the gas fired power station from going ahead in Wellington. There is an overwhelming sentiment here that we don't want it. Not only that we know it will be detrimental to our health and the health of our children with no viable economic benefit to our community.

Ms Goward, I ask you, would you like a dirty fossil fuel burning power station no more than 2 kilometres from Goulburn? Why should the people of Wellington have the same? And it's not just crazy greenies saying this Ms Goward but honest, hardworking people, families, farmers and more.

We know the station won't create the sustainable employment needed to stop our little town from going down the drain. We need solid investment in our tourism industry to become an attractive stop for people on their way to and from Dubbo. We need industries that create jobs and do no harm to our environment and the health of our community. As minister for a rural area, surely you know how important this is.

I implore you Mr Goward, why would anyone want a dirty big polluting gas fired power station run by five people right on the edge of their town?

Are you willing to deal with the health costs to come? With the election coming up I want you to know that this issue is important in the minds of everyone I know.

Thank you for your time, and I look forward to hearing from you.

Yeshe Thubten
