ATT: M/S KAREN JONES.

DIRECTOR OF INFRASTRUCTURE PROJECTS.  
DEPARTMENT OF PLANNING

In 2004 I purchased my home at 132 Gobson St, Wellington, on the bank of the Macquarie River, with a view to spending my retirement years managing my poor health in a peaceful + quiet location. I have renal failure, caused by Chemotherapy for Non Hodgkins Lymphoma thirty odd years ago having to undergo Dialysis at the Local Hospital every Monday, Wednesday + Friday. I am also being treated for Prostate cancer + now have found to have a number of Melanoma on my scalp which may have a serious outcome in the future.

The noise and other atmospheric pollution, from the proposed Gas fired

1/2

2.

Power Station, together with the unsightly appearance of the plant on the opposite side of the river in line of sight from my residence all of which will detract from my quality of life.

I therefore oppose the project being located at the currently proposed site which will have a debilitating effect on the township of Wellington.

Yours Faithfully,

Terrence King.  
(TERRENCE KING.)
