80 Cokeworks Rd Coledale.

Ph: 02 42675717.

To whom it may concern,

I am writing to express my support for the Rye Park Wind farm.

Application No: SSD6693.

Project Address: 15-40km North of Yass, Approx 3-4 west of Rye Park, 250km south west of Sydney.

The following points are in Support for the Rye park wind farm.

- Australia needs to increase its renewable energy. It is a global responsibility that will ensure a future for generations to come.
- I am a land holder who will host wind turbines. This industry will enable myself and my family to continue to farm Merino sheep on the land in a financial environment that is becoming ever harder to maintain primary industry on my land. It may enable the fourth generation of our family to continue to farm the land with this alternative income.
- Trust Power has worked with the community to ensure land holders are consulted on specifics of the project and iron out any individual concerns on each property.
- Income from the wind farm will enable us to ensure we can protect and enhance the land through reducing the number of sheep and spending on land protection projects, fertilising, stabilizing and planting.
- The Rye Park wind farm will bring socio-economic benefits to Rye Park and Boorowa. The initial construction will bring income through workers spending/working/living in the local towns. Long term, the income from the wind farms will bring benefits into the community through local spending, investment and business.

Please do not hesitate to contact me if you have any further questions.

Thank you.

Ron Pearsall.
