

We are against this proposal

We purchased a property with our Superannuation, not knowing the Wind Towers (WT) were proposed to be built. One boundary is 1-2km from the proposed wind Towers (WT) If they (WT) go ahead we have been told by Trust power that we can not build within 2km,(Who would want to live within 50km of them) But they are planning to build them a little over 1km from existing Houses.

When questioned about this they say it is only a guideline that they are not allowed (Towers) within 2km of a House .They will do as they like and in the process wreck lots of peoples lives. We have worked very hard all our lives to get what we have. Our investment will be reduced by at least 40-50 % if they go ahead.

We love to go to the Farm because it is so quite and relaxing in our old age and watch the Endangered Birds and Animals. We were leaving the Farm to our Family, but who would want it with ugly noisy (WT) right next to you, they can be seen for 50km away.

Families have left their Homes and Farms because they could not live near Wind Towers because of Health Reasons, their Lives ruined for ever.

The Destruction of the Environment building these things will last Forever

My uncle fought and died in the First World War to save this Great Country of ours Australia. Are we going to let overseas companies come here wreck our land, make a fortune by being subsidised with our hard earned tax money and leave the Landscape changed for ever, NEVER to be the same again, because of an inefficient, ugly, system.

Solar will be 100% when the Batteries are soon perfected. The panels can be put on House and Building roofs with NO damage at all to the Environment.
