Dear Sir,

I hereby submit an OBJECTION to the proposed Rye Park Wind Farm .Project NO SSD6693.

Rye Park is the home of my childhood, having been raised on a farm 9 klms from the village and return there often, as I have strong connections to the district.

It always has been a place of natural beauty, the rolling hills rising above the sleepy village and the views are to be sought after and cherished. Added to this is the unspoiled countryside of scrubby outcrops, rocks, flora, and fauna. The winding country roads leading out from the village are unique to the environment.

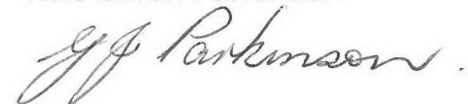

I am horrified to think there will be some giant manmade monsters, whirling and swishing away on the beautiful hills disturbing the native birds and animals, and an absolute eyesore to everyone, spoiling the landscape.

Roads will be widened, trees knocked down to accommodate the heavy transport vehicles in the construction of the turbines, and to me this is criminal, all in the name of "so called" progress. There will be turbines above Rye Park cemetery where most of my relatives are buried, and it is a Heritage sight, so should be preserved and peaceful. Farmers are always aware of protecting the environment they manage, so it should be with these big money-making companies with no connection to the district. The same laws that govern National Parks should apply to developers to preserve natural bush and farmland from ruin, by erecting unnatural, unsightly, monstrosities, especially in close proximity to built up areas and villages.

Hoping some consideration will be given to the submissions of OBJECTION.

Yours Faithfully

Mrs Gwen Parkinson
